PROFESSIONAL SUMMARY

Experienced Product Manager with 10+ years in enterprise technology, including 5+ years leading product strategy for Enterprise applications. Proven expertise in enterprise private cloud management, Self-Service automation and AI integrations. Specialized in defining and execution product vision for a Nutanix portfolio product serving 6,000+ enterprise customers with \$200M+ ARR. Deep experience in customer discovery, cross-functional leadership, and building scalable, extensible and robust Enterprise grade solutions.

Strong technical foundation with 7 years in software engineering leading full-stack development of a SaaS application platform

CORE COMPETENCIES

- **Enterprise Product Strategy & Roadmap:** Leading product vision, roadmap development, and hypothesis validation for enterprise hybrid-cloud platforms.
- **AI-Native Product Development:** Architecting AI agentic workflows, automation, and intelligent infrastructure management solutions for Enterprise AI Factory along with AI-native feature development like AI prototyping.
- **Platform Architecture & Extensibility:** Expertise in API design, cloud-native architecture, IaC, data integration pipelines, and metadata management.
- **Cross-Functional Leadership:** Driving alignment across engineering, UX, GTM, and sales teams to deliver scalable enterprise solutions.
- **Product-Led Growth (PLG) & Analytics:** Leveraging telemetry and data-driven insights to enhance feature discoverability, adoption, and outcome-driven delivery.
- **Technical Foundation:** Strong engineering background in full-stack development, system design, and cloud infrastructure (AWS, Azure, GCP).

PROFESSIONAL EXPERIENCE

Senior Product Manager – Nutanix Cloud Manager

Nutanix Technologies Pvt. Ltd. | Bengaluru, India | 2021 – Present

Working on product development for enterprise hybrid-cloud management platform (Nutanix Cloud Manager) serving 6,000+ customers with \$200M+ ARR, focusing on automation, app marketplace, data connectivity, platform extensibility, Identity & Access Management, multi-tenancy and cloud-native architecture.

- **AI-Powered Product Innovation:** Authored the strategy for AI assistant in-product tool integrating conversational AI capabilities in the product to enhance user experience and accelerate better infra management. Spearheaded the NCM MCP Server integration with broader Nutanix MCP Server. Currently, working on AI workspace orchestration (stitching LLMs inference layer, runtime K8 layer and data layer with RAG) as part of the AI Factory. Also on the side designing AI Agent Builder on Private Sovereign cloud.
- **Platform Capabilities, IAM and Multi-tenancy:** Drove product strategy along with senior leader and roadmap for platform features including cloud provider APIs, data ingestion pipelines, and integration frameworks. Directed the integration of Multi-tenancy in the product through isolated grouping construct called Projects.
- **Infrastructure-as-Code (IaC) Platform Leadership:** Independently strategized and executed roadmap for in-house IaC automation tool used for cloud orchestration. Enhanced metadata management and documentation, increasing advanced user adoption by 35% through comprehensive developer documentation and workshops.
- **API Development & Integrations:** Collaborated on cross-functional initiatives for public API development and IAM integration. Defined API specifications, authentication patterns, and security compliance requirements for enterprise customers, ensuring alignment with long-term platform vision.
- **Customer Discovery & Product-Led Growth:** Led comprehensive discovery sessions with 50+ enterprise customers and field teams to validate hypotheses and prioritize roadmap. Implemented PLG initiatives leveraging telemetry analytics, increasing feature discoverability by 45% and license utilization by 30%.

- **Self-Service Automation Enhancement:** Drove 40-50% time savings for users by enhancing automation and orchestration capabilities. Identified pain points through customer engagement, prioritized improvements, and delivered features that reduced manual IT workload management.

Senior Member of Technical Staff

Nutanix Technologies Pvt. Ltd. | Bengaluru, India | 2018 – 2021

- **Cloud Cost Governance Platform:** Led front-end development of Nutanix Beam, a cost governance SaaS product, from concept to production deployment. Delivered scalable, user-friendly application serving multi-cloud cost optimization needs.
- **Engineering Leadership & Technical Delivery:** Directed team of 4 engineers to develop reusable component library and UI state management system, reducing development cycles by 30% and improving code consistency across product portfolio.
- **CI/CD & DevOps:** Built CI/CD pipelines for seamless application deployment across cloud environments, ensuring reliability and faster time-to-market. Authored technical content with 10K+ views establishing thought leadership.

Software Development Engineer

Minjar Cloud Solutions Pvt. Ltd. | Bengaluru, India | 2015 – 2018

- Contributed to Botmetric product team, developing front-end integrations with backend systems using Java-based Play Framework and Angular 2. Gained hands-on experience with AWS services, cloud architecture, and data pipeline integrations.

TECHNICAL SKILLS & TOOLS

- **Product Management:** Product Strategy, Roadmap Development, Stakeholder Management, Customer Discovery, Data Analytics, UX Prototyping, Agile/Scrum, Backlog Prioritization
- **AI-Assisted Development tools:** Claude Code, Gemini, Cursor, Lovable, Figma Make – leveraging AI for rapid prototyping, research, code and technical documentation.
- **Domains:** Hybrid/Multi-Cloud Management, Artificial Intelligence(LLMs, RAG, MCP, Agent, Metaharness, GPU racks)
- **Tools & Platforms:** Jira, Trello, Figma, Tableau, Snowflake, DBeaver, Visual Studio, Git, CI/CD Pipelines
- **Programming & Databases:** JavaScript, TypeScript, Python, Java, SQL, REST APIs, Workflow Automation, Log Analysis

CERTIFICATIONS & AWARDS

- Rethink Systems - AI Product Management (2026)
- PMC Level III – Pragmatic Institute (2022)
- Product Management Principles – The Product Folks (2021)
- McKinsey Forward Leadership
- Winner Nutanix Hackathon 2026
- Winner Rethink AI PM Buildathon Cohort 8

EDUCATION

Japee Institute of Information Technology, Noida (India)

Bachelor of Engineering in Computer Science, B.Tech (GPA:8.1)

LEADERSHIP & COMMUNITY

- Led team of 100 volunteers in the **NGO – Make a Difference**, Bangalore Chapter (2019-2023) designing educational programs for 200+ underprivileged children, demonstrating leadership, program management, and social impact focus.
